**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 recites the limitation "wherein the cover means comprises a first part and a second part" in lines 1 and 2. This is a double inclusion of "a first part and a second part" claimed in claim 1, line 10.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 8-11 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,417,258 to Privas.

Privas shows a device for spraying fluid as seen in Figs. 22 and 28, having a replaceable or refillable container 100 with a detachable dispensing head 1; The dispensing head encloses valve means 6, a valve actuating solenoid 13 with a metal armature 12, a battery 102 (as a power source), electronic device 101 to control the opening and closing of the valve. The cover has a

first part 144 with a hook and a second part 104 with indentation where reader 146 mounts, both parts lock and cooperate with respect to each other; the first part has the hook 107 that can engage the indentation portion defined by element 106 to lock the cover to the container.

***Response to Arguments***

5. Applicant's arguments filed April 8, 2008 have been fully considered but they are not persuasive. In response to applicant's argument that the references shows a hook as part of the actuator head not as part of the cover, it is noted that the features upon which applicant relies (i.e., a hook being part of the cover) is not recited in the rejected claims. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

The device of Privas comprises at least two parts cooperating with each other to form a working dispensing head that mounts on a container and automatically actuates a pump to deliver the product contained in the container.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
